ISO 9001

In order to provide the best service to the customers and utilize the maximum of our recourses, Lesnina Inzenering Panels has implemented the internationally recognized ISO 9001 standard. It provides a framework of tried and tested activities for taking a systematic approach in managing the organization's processes, in order to meet the expectations of the customers. Our objective is working on constant and systematic improvement of the management processes, and systematically fulfilling the requirements of our customers and other involved parties.

ISO 14001

Lesnina Inzenering Panels invests a lot in safety and protection of the employees during the work and in fulfilling the requirements with respect to the environment on all levels of management in the company.

In accordance with this quality management policy, ISO 14001 standard is in process of implementation in the organization. It applies to those environmental aspects which the organization has control and over which it can be expected to have an influence. By using a systematic approach we identify and control the impact of the company's activities and actions on the environment, and we are continuously improving and developing our performances in production in order to minimize the negative effect they have on the environment.

FSC

It is our responsibility to protect and preserve the forests, as ecologically most sensible resource, and at the same time most important supply of raw material for our company - business. Therefore, we are in constant communication and cooperation with the Macedonian public company and the only authorized timber supplier – The Macedonia Forrest P.C., with who we are working on implementing the FCS certificate – forestry management certificate. However, although we are not certified yet, we have developed strict criteria to guide forestry, which purpose is to avoid uncontrolled logging, violation of human rights and environmental stress. We always strive to assure that the FSC principles are met.
